Course Programme Highlight

In the 3-6 Diploma Course students learn how to guide and maintain the classroom. To aid that students require fundamental knowledge about the healthy growth and development a child at the age of 3 to 6 years. The child requires a safe, engaging, and nurturing environment to develop trust in themselves and their world. You will have a chance to gain an understanding of the Planes of Development and the accompanying Sensitive Periods in the first six years of the child's life, with strong emphasis on the Absorbent Mind - the unique quality of the child's mind. You will also explore the activities in all areas, such as practical life, sensorial, mathematics, arts and music, the development of language and ways of facilitating the use of language by the child. What is more, you will be able to discover different conditions necessary in the process of the development of independence, together with studying Dr Montessori's view on independence, freedom and discipline. As a student you will write your own albums, make materials and learn how to balance all aspects of a Montessori classroom. Montessori Training Center Poznan will bring the AMI course to you via ZOOM and in person in Poznan, Poland.
